Ratepac

Automated currency rate import for Sage 300 ERP

Ratepac for Sage 300 ERP

Ratepac is an add-on module for the Sage 300 ERP solution, developed by Oakley Software and available for our clients as well as other re-sellers of Sage 300 ERP. Ratepac will automate the scheduled import of your current exchange rates to ensure you are up-to-date with your global transactions.

The module runs a command line executable and uses the .NET API in Sage 300 ERP to download the current rates for your configured currencies. The program is simple to use and once set up takes away the strain of what can be an arduous task.

Key Features

- Downloads and imports latest currency rates for your Sage 300 system
- Easy to use including automated daily, weekly and/or monthly imports
- Comprehensive range of global currencies (contact us for your requirements)

If you are considering Sage 300 ERP or are an existing user and would like to implement our Ratepac add-on contact us on 01268 724005 or email sales@o-net.co.uk.

Why choose Oakley Software?

- An approved Sage Developer
- An accredited Sage 200, Sage 300 and Sage CRM Business Partner
- Experienced staff with over 30 years working with Sage 300 ERP
- Client portfolio includes customers operating across multi-national markets
